If you have natal points aligned with (conjunct) any of the key points in the Venus Timeline, these will reveal more about your own personal activation during this cycle. The most important points would be the two times when Venus was aligned exactly conjunct the Sun: at the beginning of the cycle at 18°43' Capricorn and at the heart of the Underworld phase at 29°26' Libra. As a note, a conjunction with 29°26' Libra could be in early degrees Scorpio, though a conjunction across sign boundaries always has a blended effect. Ultimately, all alignments with points during the cycle have information which can help frame the experience.
